Data Analyst | Excel (MIS Reporting & Data Validation) | Building SQL, Python & Power BI Through Projects

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with hands-on professional experience in Excel-based data processing, data validation, and MIS reporting across the oil & gas and automotive service industries. Building applied skills in SQL, Python, and Power BI through self-driven projects and an ongoing data analyst certification, including a retail sales analysis project covering data cleaning, exploratory data analysis (EDA), and dashboard development. Proven track record converting unstructured data into structured, stakeholder-ready reports that support data-driven decision-making and operational efficiency.

WORK EXPERIENCE

Data Processor Coordinator (Data Reporting)

09/2024 – Present

Gulf Asia Engineering Pvt Ltd

Chennai

- Processed and validated 500+ Daily Progress Reports (DPR) weekly for oil & gas projects, ensuring data integrity and data governance standards.
- Improved data accuracy by 15–20% through systematic data cleaning, validation, and quality assurance checks.
- Converted 500+ unstructured PDF records into structured datasets to support downstream reporting and analysis.
- Built and maintained Excel-based trackers and KPI dashboards to monitor productivity and error rates.
- Generated daily and monthly MIS reports and stakeholder reporting summaries to support management decision-making.
- Automated data tracking workflows in Excel, improving reporting efficiency and turnaround time.

Coordinator & Warranty Administrator (Data Reporting)

03/2022 – 08/2024

Jayaraj Tractors

Madurai

- Managed service and warranty data across 5 branches, maintaining consistent data models for multi-location reporting.
- Reduced reporting errors by 10% through improved data tracking, validation, and governance processes.
- Handled daily transaction records and reports with high accuracy under tight deadlines.
- Prepared and submitted daily activity reports to the Service Manager to support operational decision-making.

Sales Manager

11/2021 – 03/2022

CredRight Pvt Ltd

Madurai

- Managed loan processing and data records for business and salaried customers.
- Conducted 25–30 daily customer interactions, tracking outcomes for reporting purposes.
- Achieved monthly disbursement targets of ₹10L+ while maintaining accurate transaction data.
- Performed KYC verification and data validation for loan approvals.

PROJECTS

Retail Sales & Customer Analytics (Self-Driven / Course Project) | MySQL | Python | Power BI

- Designed a normalized MySQL database schema to structure raw retail transaction and customer data for analysis.
- Performed RFM (Recency, Frequency, Monetary) customer segmentation to identify and prioritize high-value customer groups.
- Conducted cohort analysis using SQL and Python (Pandas) to study customer retention and purchasing behavior over time.
- Built an interactive Power BI dashboard to visualize sales trends, customer segments, and profitability.
- Documented the project as a written case study covering methodology, key insights, and business recommendations.
